

## Our campaign for the World Hand Hygiene Day on 5 May 2025

### On 5 May 2025 it is World Hand Hygiene Day!

Initiated in 2009 by the World Health Organization (WHO) this special day is intended to draw attention to the importance of hygiene, especially in medical professions.

Hygiene also plays a major role in your veterinary practice. The efficiency of hygiene measures should be checked regularly.

Therefore, we are happy to offer you **25% discount** on your order of a **hygiene monitoring set** during our campaign week from **5 May to 11 May 2025**.

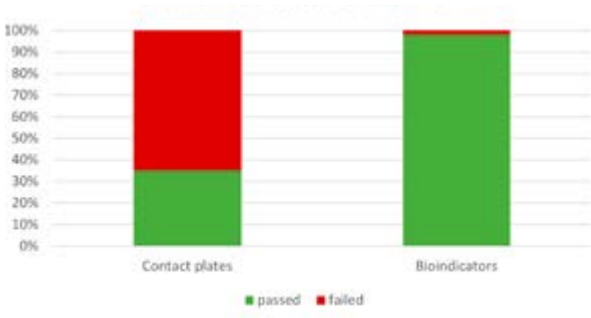

You can order using the „**Hygiene - World Hand Hygiene Day 2025**“ **submission form** in **MyLab** at **app.laboklin.com** or order printed copies by emailing **info@laboklin.com**.

## Our campaign for the World Hand Hygiene Day on 5 May 2025

### Evaluation of the test results in 2024:

### The hygiene monitoring set:

#### ➔ It consists of:

- 6 bioindicators (BI) for autoclaves or sterilisers including a bioindicator as transport control
- 3 agar contact plates (AP) for the surfaces
- Detailed description of the testing procedure

#### ➔ What does it check:

- the functionality of the steriliser / autoclave
- the efficacy of surface disinfection

#### ➔ Interpretation of results:

- BI test germs cannot be cultivated → no need for action
- BI test germs can be cultivated → maintenance of the device
- $AP \leq 10$  CFU/plate apathogenic germs, 0 CFU/plate pathogenic germs → no need for action
- $AP > 10$  CFU/plate apathogenic germs,  $\geq 1$  CFU/plate pathogenic germs → revision of hygiene concept
