LABOKLIN
LABORATORY FOR CLINICAL DIAGNOSTICS

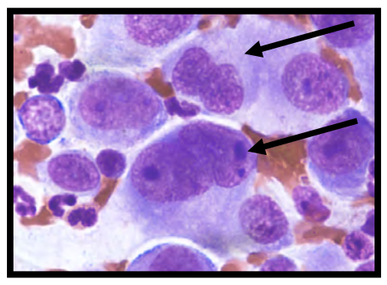

Cytology

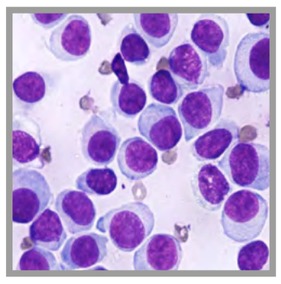

Mast cell tumour, well-differentiated, dog

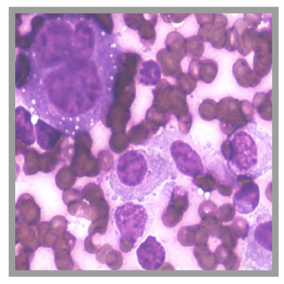

Mast cell tumour, poorly differentiated, dog

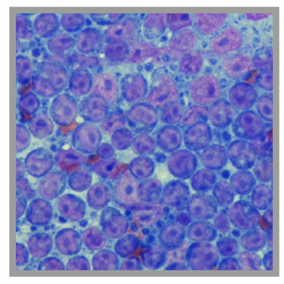

Mast cell tumour, cat

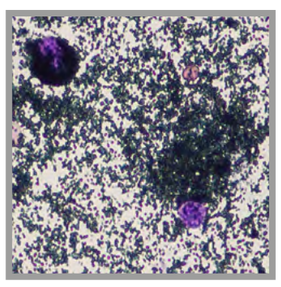

General criteria of malignancy

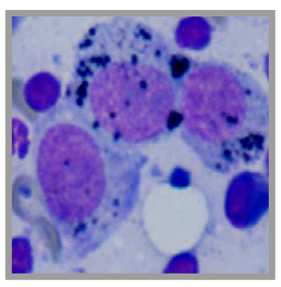

Multinucleation (arrow), anisocytosis and anisokaryosis

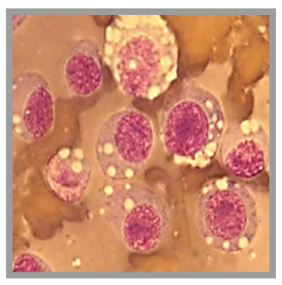

Histiocytoma, dog

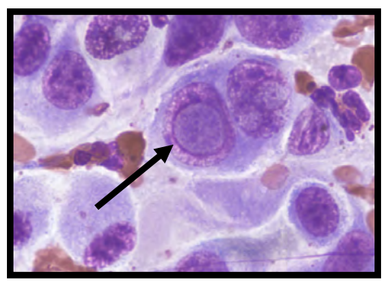

Histiocytic sarcoma, dog

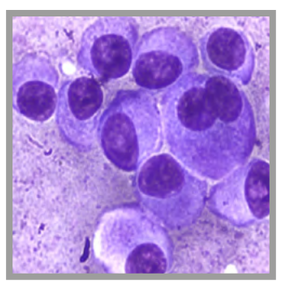

Lymphoma, dog

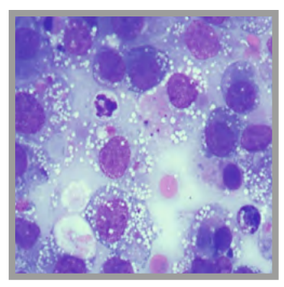

Melanocytoma, dog

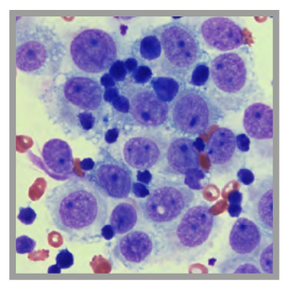

Malignant melanoma, dog

Transmissible venereal tumour, dog

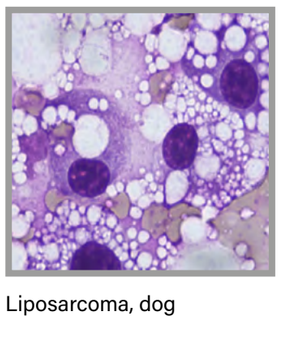

Prominent, atypical nucleoli

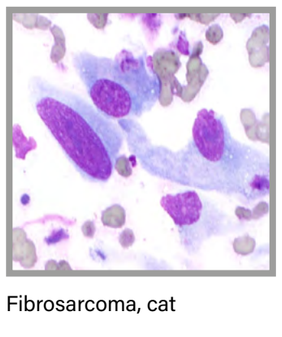

Plasmacytoma, dog

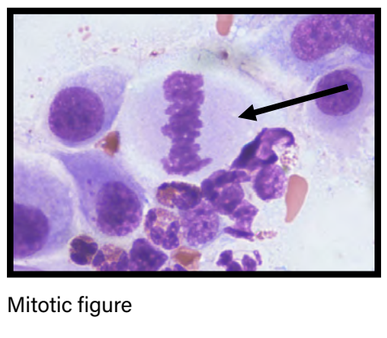

Chemodectoma, cat

Thymoma, dog

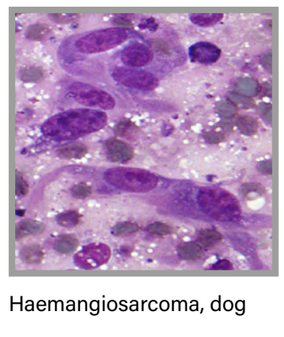

Lipoma, dog

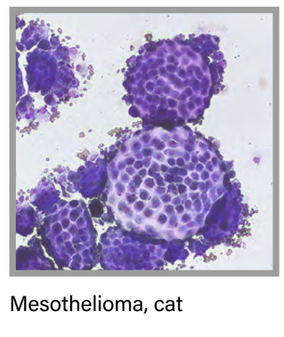

Liposarcoma, dog

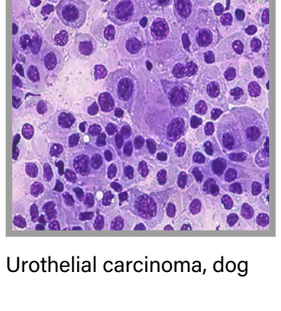

Fibrosarcoma, cat

Mitotic figure

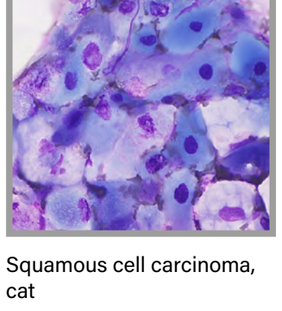

Osteosarcoma, dog

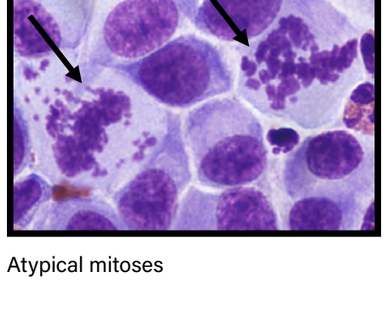

Haemangiosarcoma, dog

Mesothelioma, cat

Urothelial carcinoma, dog

Prostate carcinoma, dog

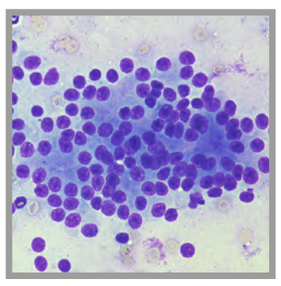

Squamous cell carcinoma, cat

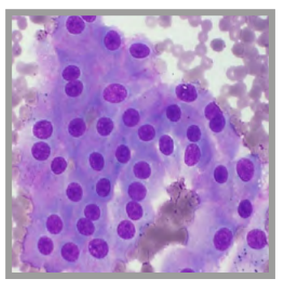

Atypical mitoses

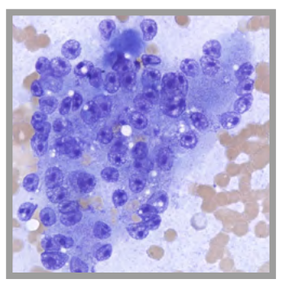

Perianal (hepatoid) adenoma, dog

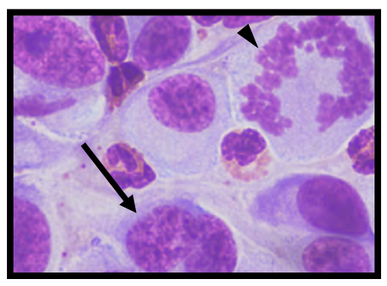

Sebaceous adenoma, dog

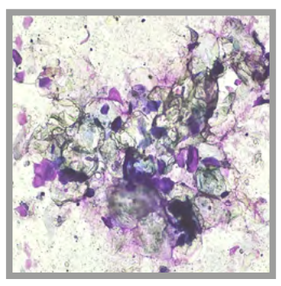

Salivary gland, dog

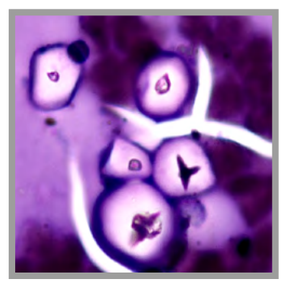

Anal sac apocrine adenocarcinoma, dog

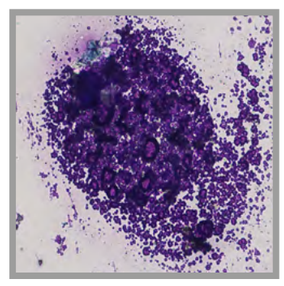

Thyroid carcinoma, dog

Hepatocellular carcinoma, dog

Anisocytosis and anisokaryosis, mitosis (arrowhead), binucleation (arrow)

Hair follicle cyst, dog

Talcum

Ultrasound gel
